

Green building compliant, water based, low VOC, **floor treatments** for car parking facilities

COLOUR COATINGS

Epo Shield WB (Water based epoxy floor coating)

CONPELL Epo Shield WB is a high performance, durable clear or coloured water based epoxy floor coating, designed to provide a decorative, hard wearing floor surface for basement car parking facilities. Epo Shield WB is available in 24 standard colours, or can be tinted to any colour on request.

Green building compliant product with a VOC content of only 48.00gms per litre of mixed product.

GLOSS FINISHES

Dura Shield AW (High build, extended wear, water based clear acrylic sealer)

Dura Shield AW is a high performance, high build, single pack clear water based acrylic floor sealer designed to provide a cost effective, long lasting, high gloss floor sealer. Dura Shield AW makes the floor surface easier to clean by rendering the floor surface resistant to staining from water & oil based contaminants.

Green building compliant product with a VOC content of 97.00gms per litre of mixed product

WATER RESISTANT FINISHES

Dura Shield HS (Heavy duty sealer, surface hardener & anti-dusting agent)

Dura Shield HS is a high performance penetrating sealer, concrete surface hardener & anti-dusting agent designed to increase the durability of the concrete surface, making the surface resistant to wear in high traffic areas, while rendering the surface resistant to moisture & moisture borne contaminants.

Green building compliant product with a VOC content of <5.00gms per litre of mixed product.

MATT FINISHES

Dura Shield (General purpose surface hardener & anti-dusting agent)

Dura Shield is a general purpose concrete surface hardener & anti-dusting agent designed to increase the durability of the concrete surface while making the surface resistant to wear in high traffic situations.

Green building compliant product with a VOC content of <5.00gms per litre of mixed product.
