

SEALER STRIPPER

Solvent based gel stripper designed to aid in the removal of solvent and water based Acrylic sealers.

DESCRIPTION

CONPELL Sealer stripper has been designed to aid in the removal of old or damaged solvent or water based Acrylic sealers prior to the application of a new sealer system.

PRODUCT FEATURES & BENEFITS

- **Easy to apply**
- **Cost effective**

TYPICAL APPLICATIONS

To aid in the removal of old or damaged Acrylic concrete sealers.

APPLICATION RATES

Application rates will depend on the condition of the existing sealer.

PACK SIZES

CONPELL Sealer Stripper is available in 10ltr plastic containers.

SURFACE PREPARATION

For best results ensure the surface is clean and free of all dirt and contaminants prior to apply Sealer Stripper.

APPLICATION

Do not apply in direct sunlight, Always start at the lowest point of the area that needs Acrylic sealer removed. Broom gel onto the surface using a solvent resistant broom head, apply to 5-10sqm at a time, allow the stripper to soften the surface, once adequately softened where possible scrape off and remove the majority of the Acrylic sealer. Remove all remaining product by way of high pressure water blaster until all product has been removed.

Waste must be disposed of in accordance with federal, state and local government control regulations.

CLEAN UP

Clean up with xylene.

PRECAUTIONS

- Some individuals may experience a skin reaction to CONPELL Sealer Stripper. Use appropriate protection equipment. Refer to our Material Safety Data Sheet for further information.
- In enclosed areas ventilation should be provided during the application and removal process to allow for adequate evaporation of the product.
- Apply CONPELL Sealer Stripper between 10°C - 30°C.

Contact the manufacturer if one or more of the following conditions exist:

- Ambient or substrate temperatures are below 10°C.

Sealer Stripper
