

# HARDEN-CURE

## Description

**CONPELL Harden-Cure** is a specifically designed low VOC water based concrete floor treatment. Harden-Cure is designed to incorporate a silicate based concrete hardening agent with an acrylic copolymer curing solution. When applied correctly the finished surface will be cured to meet Class D, Type 1 and is compliant with AS 3799-1998 Appendix B. The completed surface is rendered dust free and easy to clean.

## Features & Benefits

- ▶ Stops concrete dusting and renders the surface easy to clean
- ▶ Low VOC, Green star building compliant
- ▶ Meets Class D Type 1, AS 3799-1998 Appendix B for concrete curing
- ▶ Compatible with most glues and adhesives
- ▶ Easy to apply (applied at concrete placement stage of construction)
- ▶ 10 year warranty

## Typical Applications

CONPELL Harden-Cure is specifically designed to harden the concrete surface while providing a high solids film forming curing membrane and is suitable for industrial and commercial concrete surfaces.

CONPELL Harden-Cure is designed for use on internal and external concrete surfaces including single, multi story basement and above ground car parks, external hardstand areas, warehouse and factory floors or anywhere a durable hardwearing concrete surface is required.

## Harden-Cure Projects

- ▶ Hamilton Harbour
- ▶ The Plaza Apartments
- ▶ HQ Building
- ▶ Oracle Apartments
