

## APPLICATIONS – Citrus Degreaser

Citrus Degreaser contains several key ingredients that perform far more effectively when allowed to soak for 5 minutes before washing off. Exact dilution ratios depend on the applicator and level of soiling. Always perform a test sample before applying to an unknown surface.

<b>Floors</b>	If using a bucket and mop, 1 cup to a bucket of warm water.
<b>Painted Walls</b>	Between 5:1 and 10:1 depending on soiling.
<b>Decks</b>	10:1 as prep before oiling or for general cleaning.
<b>House Exteriors</b>	20:1 when used as a spray. For professional use, it is recommended to mix 2 L of Citrus Degreaser with 2 L of chlorine in a 20 L container, then fill the remainder with water and apply via pressure cleaner.
<b>Concrete</b>	Between 10:1 and 20:1 via pressure cleaner depending on the level of soiling. If oil is present, apply neat to the worst areas, allow to dwell, then agitate with a brush.
<b>Brickwork</b>	As above
<b>Conveyor Belts</b>	5:1 to 10:1 for thorough cleaning, otherwise for general cleaning use the same mix as <b>Floors</b> .
<b>Cars &amp; Motorcycles</b>	For engines and parts apply at 3:1 and agitate with a brush. Apply neat for heavy engine soiling.
<b>Auto Detailing</b>	Spot clean carpet and fabrics at 3:1, general interior pieces at 5:1. Allow to dwell for 2 minutes before washing off.
<b>Fabric</b>	3:1 as a pre-wash spray, then rub fabric against itself.
<b>Carpet</b>	Spot clean at 3:1, or 12:1 when used with a carpet scrubber.
<b>Workshop Floors</b>	Apply neat to areas of heavy soiling, or 10:1 for general cleaning.
<b>Marine</b>	Apply to seats at 3:1 to 5:1, covers and decking at 5:1 to 10:1, and fish boards at 3:1.
<b>Machinery</b>	Between 3:1 and 10:1 depending on the level of soiling.
<b>Food Processing Equipment</b>	As with <b>Conveyor Belts</b> .

More uses are available than listed here. Citrus Degreaser is a highly versatile product and heavily used by professionals Australia-wide.
