

# Polish Grout

Acrylic binder for grouting concrete floors.

## DESCRIPTION

CONPELL Polish Grout is a specifically formulated Acrylic binder used to fill pin holes, air pockets and minor imperfections in the concrete surface during the polishing process.

## PRODUCT FEATURES & BENEFITS

- Cost effective
- Highly liquid
- High bond strength
- Fast drying
- Australian made

## TYPICAL APPLICATIONS

Used as an Acrylic binder to fill minor holes and imperfections in the concrete surface during the concrete polishing process.

## TOTAL VOC

TVOC's calculated as the sum total of the VOC's of each individual raw material component.  
The total VOC is <10 grams/ litre of ready to use product.

## PACKAGING

CONPELL Polish Grout is available in 15ltr containers.

## MIX Ratio

Mix 1 Part Polish Grout to 1 Part clean water. CONPELL Polish Grout can also be used neat on soft concrete surfaces.

## COVERAGE

5-7 sqm/litre/per coat.

## SURFACE PREPARATION

All concrete surfaces should be structurally sound and free of all contaminating material, including all previous coatings, adhesives, dirt, grease, oil, waxes, efflorescence or laitance by way of mechanical grinding.

## APPLICATION

Lightly wet the surface. CONPELL Polish Grout should be mixed at a ratio of 1 Part Polish Grout to 1 Part water then applied liberally onto the concrete surface and spread using a soft broom or micro fibre mop. Keep the surface wet and slowly grind the surface using 60 grit or 120 grit metal bond diamonds or similar. Ensure you grind the surface long enough so that the mixture of concrete dust and polymer becomes a thick paste to allow the grinder to drive the paste into the pores of the concrete.
